## PANCAKES & PAJAMAS FEBRUARY 2, 2019

Our annual Saturday Pancakes and PJs event was a great success. We gathered together at our program room, in our "jammies" to eat breakfast and to celebrate our learning community. Our thanks to anyone who helped with set-up, cleaning up and cooking in the kitchen. Everyone's participation was greatly appreciated.

## WORKING TOGETHER ACROSS GRADES

We encourage children to help each other across grades. Such kind actions enrich our community of learners. Here, a third grader helps a first grader to make a penguin.

## K-2 STEM ACTIVITY MAKING A TOWER

Students in grades K-2 experimented with making the tallest tower they could using ONLY marshmallows, dried pasta, and toothpicks. Our creative, intrepid scientists patiently tried different strategies to construct their towers to be tall stand-alone buildings.

## February 20, 2019

### MATH GAMES

Playing different math games develops and improves basic operation skills, (addition, subtraction, multiplication and division) They also help children develop stronger number sense and math problem solving strategies. This week K-2 played Connect 4 Addition, Addition War and The Game of Piggy. Grades 3-7 Played Triangle Tower, and Multiplication Tic-Tac-Toe. We will introducing more games as the year progresses and will be sending home a few games for your child to play over the summer break.

## SUMMER PROGRAM ALERT!

HTASC is considering implenting a morning K-5summer program during the month of July. This program would be a combination of indoor and outdoor activities, and would include field trips to other places of interest. We are still in the planning process. Please let Ms. S. know if this would be of interest to your family. Feel free to spread the word.
