CELEBRATING BLACK HISTORY MONTH GRADES 3-5

3-5

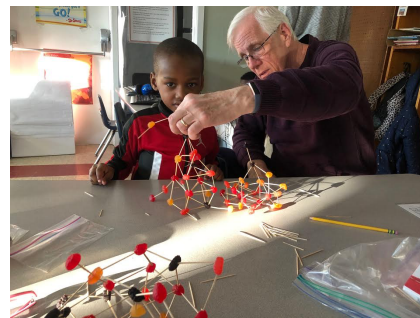

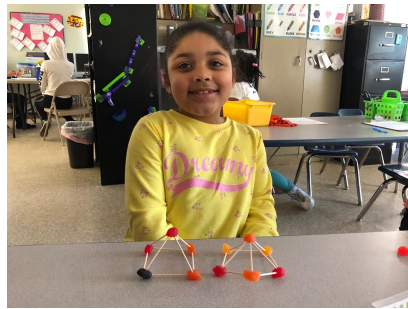

Grades 3-5 students chose a famous black american, and researched important details about his or her life.

Individuals that the students selected are well known for their participation in the arts, science, politics and sports. Some examples are Oprah Winfrey, Barack Obama, Will Smith, Lebron James and Muhammed Ali. The posters are displayed in the program room. When you have a second, do stop by and check them out.

K-2 STEM/MATH ACTIVITY MAKING 3D TOWERS

Students in grades K-2 experimented with making different 3D cubes and pyramids using toothpicks and gummies. They then assembled them to construct tall buildings and structures.

SUMMER PROGRAM ALERT!

HTASC is considering implementing a morning K-5 summer program during the month of July. Hours 9:00- 12:00.

This program would be a combination of indoor and outdoor activities, and would include field trips to places of interest.

Please let Ms. S. know if this would be of interest to your family. Feel free to spread the word.

March 20, 2019

SPRING IS AROUND THE CORNER.....

With Spring fast arriving, it's planting time and K-2 students are all ready!! The children learned that plants need seeds, water, soil and sun to grow and they put arugula, bean, squash and pea seeds in plastic bags, with soil and water, which they attached to our window. As the seeds developed, the children saw them germinate into plants and then they transplanted them into pots. Now they are observing their development and watering them each day. The plants are thriving and the students are recording their observations in their Plant Growth Journals. Ask your child about their plant's progress.

REMINDERS

- HTASC will not be in session Friday, March 22 and 29 as Poughkeepsie City Schools are closed.

- HTASC provides a healthy snack to the children on their arrival. Other snacks should be kept in their backpacks. Gum is not permitted in program.
